PROFESSIONAL EXPERIENCE

As a Bridge System Engineer (BrSE) / Business Analyst (BA) - the mid-point between customers and offshore team, my main tasks were:

- **Business Analyzing:** Read and researched all documents of projects, clarified the requirements, communicated with customers to define every features related to projects.
- **Project Coordinating:** Translated all documents and meetings from Japanese to Vietnamese and versa; managed tasks to keep deadline, discussed solutions with PM if there are late tasks; created documents related to projects; reported to PM and customer everyday.
- **Customer Service:** Communicated directly to customers; reported the process of projects daily; picked up and took care of customers when they came to Vietnam

In the projects below, I will describe tasks that are different from the three tasks above.
